Corporate Data Protection and Cryptographic Controls Policy

Policy Name: Corporate Data Protection and Cryptographic Controls Policy
Category: Data Protection
Version: 1.8
Owner: Data Governance & Privacy Committee
Effective Date: 2026-03-01
Review Date: 2027-03-01

1. Objective

This policy defines baseline cryptographic protections, data classification, and DLP requirements across all cloud storage repositories.

2. Encryption Standards

- Sensitive corporate and customer data must be encrypted using approved cryptographic standards such as AES-256 at rest.

- All communications carrying confidential data across public networks must enforce cryptographic encryption in transit.

- Data Loss Prevention (DLP) controls must be deployed across cloud assets and endpoints.

3. Auditing

Periodic validation of cryptographic keys and volume encryption state will be reviewed quarterly.
